\*The Fuel consumption and emission values provided on this website are calculated using the Worldwide Harmonised Light Vehicles Test Procedure (WLTP). WLTP is a legally prescribed procedure for measuring Fuel consumption and CO<sub>2</sub> emissions under more realistic conditions than its predecessor, the New European Driving Cycle (NEDC). For vehicles newly type-approved since January 1, 2021, the official data only exists according to WLTP. Since the test conditions are more realistic, the Fuel consumption and CO<sub>2</sub> emission values measured under WLTP are often higher than those measured under NEDC.
